The Apple Macintosh Performa 6400/180 is one of the most powerful, expandable, and easy-to-use multimedia computers you can get for your home. Continuing Apple's multimedia leadership, its robust features and high-quality pre-installed software make it an ideal system on which your whole family can learn, create, and communicate.

A state-of-the-art RISC-based PowerPC 603e processor running at up to 180 megahertz delivers the performance you need to run an abundance of powerful multimedia applications.

The Performa 6400/180 computer also includes a host of features. A built-in 8x-speed CD-ROM drive delivers smooth video and audio. A 64-bit video architecture and 1 megabyte of video memory provide high-quality video and realistic graphics on monitors up to 17 inches (diagonal measurement) in size. The system also features 16-bit CD-quality stereo input and output, SRS surround sound, and a subwoofer speaker—a combination that will add a whole new audio dimension to your multimedia experience.

With 16 megabytes of RAM (expandable to 136 megabytes), the Macintosh Performa 6400/180 has the memory to run powerful multimedia applications. And its 1.6-gigabyte hard drive gives you all the storage you'll need for a long time to come.

For connecting to the Internet, the Performa 6400/180 offers easy access either through America Online (in the United States) or directly through the Apple Internet Connection Kit, which features Netscape Navigator software. And with the built-in 28.8-kilobit-per-second modem*, exchanging e-mail and browsing the World Wide Web can be fast.

If you need compatibility with MS-DOS or Windows software—based computers, a Performa 6400/180 system gives you several choices. You can share floppy disks and files by using Macintosh PC Exchange and Macintosh Easy Open software (both included). SoftWindows from Insignia Solutions (available separately) lets you run Windows applications right on your Performa system. For the ultimate in compatibility, Apple's optional PC Compatibility Card puts a 100-megahertz 586-class processor right in your computer.

The Macintosh Performa 6400/180 computer: High-performance multimedia for your home.
