THE LITTLE GEM WITH BIG FEATURES.

The CS-2200/SX NoteBook PC.

Wherever your work takes you, both mentally and physically, the Cordata NoteBook PC provides all the power and functionality you need. Putting desktop power and speed at your fingertips. Its go-anywhere rugged body houses the latest technology. So it is remarkably easy to operate, even in cramped or rough conditions. Yet it is small enough to travel in a briefcase - or rucksack.

Travel light with heavyweight features.

The Cordata NoteBook PC is packed with powerful features. Highlights include a 20 MHz 80386SX processor, a drive of at least 40Mb capacity, a crisp CCFT sidelight VGA graphic LCD display screen and 1Mb of memory expandable to 5Mb on board. Yet the unit is no larger than a sheet of A4 and weighs only 3.1 Kg.

Personal Communications Centre.

The unit also doubles as a personal communications centre, with a two way fax and modem facility. This is a Bidirectional Class II, which means you can continue to work while sending or receiving fax.

The right connections.

Apart from the fax/modem facility, the NoteBook PC will also connect you to an external 3.5 inch or 5.25 inch floppy drive. A printer. An external keyboard. Or a larger high resolution VGA screen.

Secret feature.

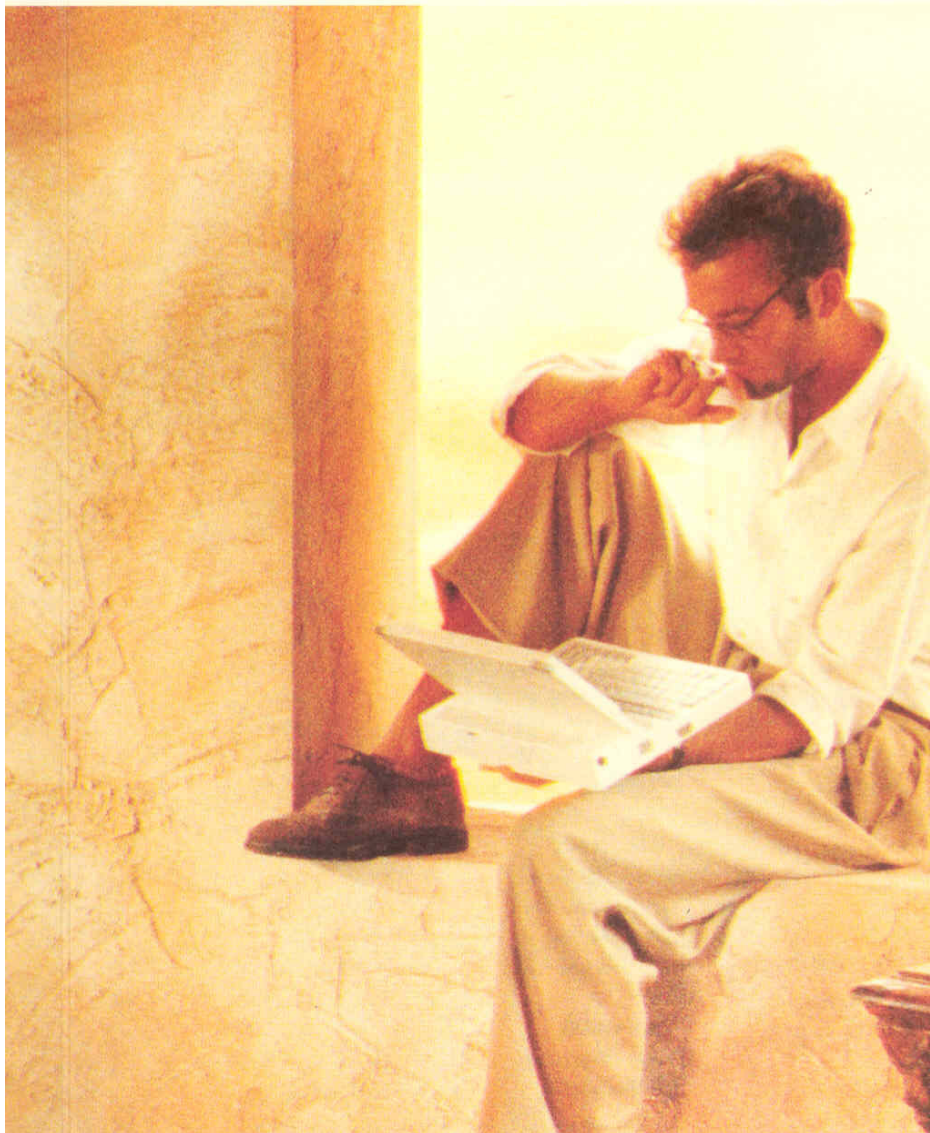

The Cordata NoteBook PC has a security password feature that allows you to protect data stored in your computer. Once you have set up the security password it will prevent unauthorised users from booting up the system. The system will prompt you for the password every time you turn on the machine. The most common password is Secret - so don't use it.

Charge while you work.

The Cordata NoteBook PC also features an easily removable 2hr Ni-Cad battery pack and a spare 3hr pack. Better still, you can carry on working while the battery in the machine is being re-charged.

Power Conservation.

The Cordata NoteBook is packed with Power Conservation Features. The Save Screen Time feature conserves the battery power by blanking the screen when the screen is idle. In a similar way, the Hard Disk Timeout feature conserves power by preventing the hard disk from spinning after a period of inactivity. Both the serial and parallel ports will switch off automatically if unused. And the 2-stage battery warning helps you manage power

High resolution LCD screen for sharp, clear text and graphics.

Reduced wrist strain with a low profile 84-key AT keyboard.

Specially designed to occupy less space in your briefcase.

Modem port turns unit into two way fax. Unit also connects external video screen, printer, mouse and keyboard.

as intelligently as the NoteBook is designed to. Knowledge is power, and knowing how to use these features will stretch your useful power.

Powerful Extras.

Extra features which come as standard include a Mouse and Microsoft Windows software. The unit also features Indicator Lights designed to be visible when the unit is open or closed. A further space-saving feature is the adaptor for the unit, which is the smallest in this product range.

Normal or Reverse.

The Cordata NoteBook PC allows you to select either the normal video mode, white characters on a dark background, or

reverse mode, dark characters on a white background. Whichever you prefer.

Cordata. A global reputation for quality.

At Cordata we provide high-quality, high-performance computer products to an international market in 35 countries. Our experience in these tough markets is backed up by our partnership with the multi-billion dollar Daewoo Electronics Co.. A partnership that is a clear demonstration of our long-term commitment to developing high-quality PC products worldwide.
