## COMPAQ SYSTEMPRO/XL -- Standard Features On All Models:

### System Processor

- 50 MHz Intel 486 Microprocessor with Integrated Numeric Coprocessor and 8 Kbytes Integrated cache and integrated cache memory controller;
- 256 Kbytes ServerCache-2

### Memory

16 MB Advanced ECC memory, expandable to 512 MB (capable of correcting single, double and multi-bit errors)

### System Architecture

TriFlex Architecture—integrates 64-bit processor bus, 128-bit memory bus and 32-bit EISA bus

### Expansion Slots

- 11 full size expansion slots
  - Eight full-sized 8-/16-/32-bit EISA bus master slots
  - Two 64-bit processor slots
  - One 128-bit memory slot

### Storage

- 11 mass storage device positions
  - QuickAccess storage area supporting up to 3 devices
  - Lower storage area supporting up to 8 devices
  - 3.5 inch 1.44 Megabyte Diskette Drive
- Supports 4 ProLiant external storage system for total of over 29 Gigabytes of storage

### Disk Controller

Fast-SCSI-2 or IDA-2 Controller

### Video Graphics System

Integrated VGA

### Interfaces

- Two buffered serial, 1 parallel, 1 pointing device (mouse),
- 32-bit NetFlex controller configured for Ethernet; optional support for Token Ring
- Integrated SCSI-2 port for secondary peripheral options

### Server Management

#### Fault Tolerance

IDA-2 supports RAID 5, RAID 4 and RAID 1;  
Advanced ECC Memory

#### Fault Prevention

Dynamic Sector Repairing,  
Drive Parameter Tracking,  
Array Accelerator Tracking  
Memory System Tracking

#### Rapid Recovery Services

Automatic Server Recovery,  
Corrected Error Log,  
EISA Configuration History and  
Revision History Table

### Keyboard

Enhanced Keyboard

### Network Security Features

External Keylock, Power-on Password, Keyboard Password,  
Network Server Mode, Diskette Boot Control, Diskette Drive and  
Write Controls, Serial and Parallel Interface Controls, EISA  
Config. Lock

### Mechanical Design

Improved side access chassis to snap-in fixed disk drives for simplified serviceability; Front panel disk activity and error correction LEDs

### Power Supply

435-Watt with automatic line switching

### Software Support

NetWare v3.11 from Compaq  
Novell NetWare v3.x and NetWare 2.x  
SCO UNIX Systems 3.2.4 with MPX2.0  
Microsoft 2.0 and LAN Manager 2.1  
Banyan VINES Unlimited  
Banyan VINES SMP, VINES 5.01  
COMPAQ INSIGHT Manager  
Microsoft MS-DOS v5 as published by Compaq

### Software Utilities

COMPAQ Diagnostics;  
COMPAQ EISA Configuration Utility;  
COMPAQ User Programs Diskettes

### Warranty

Three-year limited warranty  
Three-year on-site limited warranty in North America  
7-day x 24-hour customer support for PC server hardware  
Optional 7-day x 24-hour customer support for network o/s
