UltraLite™
Laptop Computer

Portability Redefined

The NEC UltraLite laptop computer brings new meaning to the word portability for laptop computers.

The UltraLite weighs only 4.4 pounds, and is only 1.4 inches thick. It can easily fit into a standard size briefcase and leave ample space for your working papers.

The UltraLite features a 78-key, full-size keyboard for comfortable typing; and an EL backlit, supertwist LCD screen for easy readability under a variety of lighting conditions. The UltraLite features 640K of main memory and a 9.83 MHz NEC V-30 microprocessor to provide four times the processing power of XT class computers.

The UltraLite laptop computer comes equipped with a standard 1MB or 2MB silicon hard disk and an easily accessible ROM/RAM card slot. A variety of popular applications are available in ROM card format. An optional 3½-inch floppy disk drive is available. A built-in 2400 BPS modem and built-in LAP-LINK software provides high-speed communications capabilities. Microsoft DOS Manager software makes the UltraLite easy to use, even for the novice laptop computer user.
